SafetyDataSheet

Issued/Revised on April 01, 2021. Ver. 4

1. Identification of product and manufacturer/supplier details

- Product Identification number: Manufacturer/Supplier Address Section in charge: Direct phone number:
- Emergency phone number:

- : Slion Tape #5971
- : Maxell, Ltd.
- 3819 Noborito, Tama-ku, Kawasaki, Kanagawa, 214-0014, Japan
- Quality & Environment Administration Section
- : +81-44-577-2482

Compound

Adhesive tape

Not applicable

: General Affairs Section +81-44-922-1131

2. Hazards Identification

GHS classification

: The captioned product is an article and not correspond to the criterion of GHS classification.

3. Information on composition and ingredients

Single chemical substance or compound: Generic name

Chemical characteristics (chemical formula, etc.):

Ingredients and composition

Components and ingredients	Content (wt.%)	CAS No.	Note
Base (Non-woven mesh)	1~2	—	The Tape contains 1.2% of manganess dioxide(CAS 1313- 13-9, Type1 designated chemcal substance)
Pressure sensitive adhesive	87 ~ 97	—	
Release paper	2~12	_	

÷

4. First-aid Measures

In case of the adhering to skin

In Case of Eye Contact

In case of swallowing

5. Fire-fighting Measures

Extinguishing Media

Specific hazards during fire

Extinguishing method Protection for Fire-fighter

6. Accidental release measures

Personal Precautions Environmental Precautions

Methods and materials for containment and cleaning up

- : Peel off slowly, then wash thoroughly by soap and water. In case of feeling sick, please consult with the doctor.
- : Wash away thoroughly by clean water. If there is irritation, please have the doctor's treatment.
- : Spitting out as possible, and if you felt abnormality, please have the doctor's treatment.
- : The pouring water, the water spraying, the powder extinguishing agent, the carbon dioxide gas, the foam extinguishing agent.
- : There are possibilities of carbon monoxide or carbon dioxide gas occurrence by thermal decomposition and incomplete burning.
- : Extinguish by using extinguishing media from windward.
- : Wear a fire suit by the situation. Also, against carbon monoxide and carbon dioxide, wear a suitable respiratory protective device.
- : Not applicable
- : Not applicable
- : Sweep up scraps together by a broom, etc.

SafetyDataSheet

Issued/Revised on April 01, 2021. Ver. 4

: For a long term and repeatedly, let the adhesive surface not

touch to the skin. Also, let not to touch the eyes.

7. Precautions for handling and storage

Handlir	ng
---------	----

Technical measures

	: Avoid contact to flame, spark or high temperature object for prevention of the fire.	
Precautions	: Not applicable.	
Precautions for safe handling	: Not applicable.	
Storage		
Technical measures	: Fire Attention	
Storage conditions	: Storing at cool and dark place is desirable.	
Packaging container material	: Not applicable.	
8. Exposure controls / Personal protection		
Equipment measures	: Installing equipment for eye cleaning and body washing near the handling place.	
Control density parameters	: Not applicable.	
Allowance density parameters	: Not applicable.	
Personal protection equipment		
Respiratory protection	: Not necessary in general	
Hand protection	: Wear protective gloves	
Eye protection	 It's not necessary in general, but if necessary, please wear normal eye glasses, and protection glasses. 	
Skin and body protection	: Let the adhesive surface not to touch directly to the skin and	
	body by protective gloves or like	
9. Physical and chemical properties		
Physical State	: Solid	
Form	: Roll or Sheet	
Melting/Solid point	· No data	

Melting/Solid point	: No data
Boilling point	: No data
Flash point	: No data
Autoignision temperture	: No data
Specific gravity	: Approx. 1.4 (Except Release Paper)
10. Stability and reactivity	
Stability and reactivity	: Under the general storage and handling, it is stable and not reactive. It will not react dangerously at normal temperature.
Hazardous Decomposition Products(Excluding carbon-oxide,	: So far, no significant data is available.

carbon-dioxide, water)

11. Toxicological information

TT. Toxicological information	
Acute toxicity	: No information as a product
Skin corrosivity/irritation	: No information as a product
Serious damage/irritation against eyes	: No information as a product
Sensitizing potential of respiratory organs	: No information as a product
Sensitizing potential of the skin	: No information as a product
Germ cell mutagenicity	: No information as a product
Carcinogenicity	: No information as a product. But contains extremely small
	amount of PAHs in the adhesive.
Reproductive toxicity	: No information as a product
Specific target organ systemic toxicity(single exposure)	: No information as a product. But contains manganese dioxide in
	the adhesive.

SafetyDataSheet

Issued/Revised on April 01, 2021. Ver. 4

To consign to the official industrial Wastes Dispositi Specialist who has permission of governor and so forth, a dispose. In case of consigning the processing of the wastes, pleat consign after notifying the hazardous and toxicity enough to the unit of the wastes are consigned after notifying the hazardous and toxicity enough to the unit of the wastes are consigned after notifying the hazardous and toxicity enough to the unit of the wastes are consigned after notifying the hazardous and toxicity enough to the unit of the wastes are consigned after notifying the hazardous and toxicity enough to the unit of the wastes are consigned after notifying the hazardous and toxicity enough to the unit of the wastes are consigned after notifying the hazardous and toxicity enough to the unit of the wastes are consigned after notifying the hazardous and toxicity enough to the unit of the wastes are consigned after notifying the hazardous and toxicity enough to the unit of the wastes. 4. Transport information : Not applicable Precautions at transportation : Avoid water-stained and rough handling, not to break package 5. Regulatory information : Correspond to nominated inflammable substance (3,000kg a more case) Industrial Safety and Health Law : Excluded. A Product that does not become a state other than solid state and does not become powder or granular.	Specific target organ systemic toxicity(repeated exposure)	: No information as a productt. But contains manganese dioxide	
2. Ecological information Mobility in the soil : No information Residual property and degradability : No information Bioccumulation characteristic : No information Harms to ozoen layer : No information 3. Disposal consideration : For disposal, please obey to related laws and local standard To consign to the official industrial Wastes Dispositi Specialist who has permission of governor and so forth, a dispose. In case of consigning the processing of the wastes, plea consign after notifying the hazardous and toxicity enough to the unitable substance dispose. In case of consigning the processing of the wastes, plea consign after notifying the hazardous and toxicity enough to the precautions at transportation 4. Transport information : Not applicable International rules : Not applicable United Nations classification and United Nations number : Not applicable Precautions at transportation : Not applicable Fire laws : Correspond to nominated inflammable substance (3,000kg a more case) Industrial Safety and Health Law : Excluded. A Product that does not become a state other than solid state and does not become powder or granular. PRTR Law : Contain more than 1 ppm of PAHs of the objective substance that is restricted by ANNEX XV II. However, the subject is to touch the human skin or mouth a long time, or repeat to touch in a short period. EU REACH Restriction : C		the adhesive.
