Adhesive Tapes for Construction and Civil Engineering

<http://sliontec.maxell.co.jp>

You never would have guessed it, but Maxell tapes are everywhere.

With the advancement of construction techniques, adhesive tapes are being used on all scenes of modern construction and civil engineering, from large scale facilities and buildings to conventional homes. Additionally, adhesive tapes have become a key element in the further streamlining, simplifying, cost efficiency, and environmental response of construction projects. Maxell offers superior adhesive tapes through high-quality, low-cost oriented research and development and a highly dependable, experienced system of production.

Public Facilities (waterproofing)

Our butyl tapes, with their superior waterproofing and air-tightening properties, are used as waterproofing seals for the lifeline public utility conduits of the infrastructure of large scale public facilities such as universities, general hospitals, and convention centers.

C Lifeline public utility conduit

NO.4420 Thickness 0.750mm Single coated Super Butyl Tape

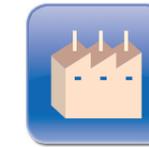

Timber framed construction. For home waterproofing and patching. Excellent durability and water resistance.

- Nonwoven polyester fabric
- Butyl rubber adhesive
- Release paper

NO.9244 Thickness 0.500mm Single coated Super Butyl Tape

For home waterproofing. Excellent durability and water resistance.

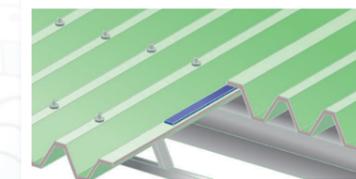

- Nonwoven polyester fabric
- Polyethylene film
- Butyl rubber adhesive
- Release paper

Factories

Our butyl tape is optimal for various uses such as a sealing material for the overlapped sections of seam jointed metal roofs used in facilities such as factories and as an airtight sealing material in the piping of refrigerated storage units. Our tape maintains a balanced, high level of adhesive force over a wide temperature range for extended periods of time.

C Waterproofing (metal roof)

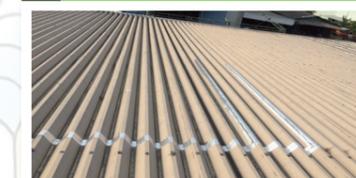

NO.5931 Thickness 1.000mm Double coated Super Butyl Tape

For use on metal roofing and as temporary waterproofing on external wall materials. Highly adhesive. Durable and water resistant. Watertight.

- Butyl rubber adhesive
- Polyethylene net
- Butyl rubber adhesive
- Release paper

C Repair of roofing

NO.4420 Thickness 0.750mm Single coated Super Butyl Tape

For repairing of metal roofing. Good durability and water resistance. Water vapor permeability: 2.5g/m²•24h For waterproofing membrane.

- Nonwoven polyester fabric
- Butyl rubber adhesive
- Release paper

NO.9839 Thickness 0.450mm Single coated Super Butyl Tape

For dampproofing of urethane foam heat-insulating materials. For waterproofing. For flashing outdoor.

- Aluminum foil (25µm)
- Polyester film (25µm)
- Butyl rubber adhesive
- Release paper

Construction Sites

By adhering tapes such as those indicating dangerous and restricted areas, cautions, and safety messages, people passing by construction sites will easily recognize hazards. Not only do these tapes tear easily by hand, they adhere excellently to rough surfaces such as concrete and plywood.

D Danger indicators

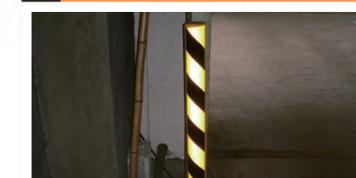

NO.3362SS Thickness 0.260mm Single coated Tape for use as danger indicators

For use as danger indicators at construction sites, walkways, factories, and train stations. Colors: Yellow and black.

- Polyethylene laminated cloth
- Rubber adhesive

D Danger indicators (reflective)

NO.9651 Thickness 0.100mm Single coated Reflective tape

For use as danger indicators at construction sites, walkways, factories, and train stations. Highly reflective. Colors: Red and white.

- Printed film
- Glass beads
- Aluminum vapor deposition
- Acrylic adhesive
- Release paper

NO.9652 Thickness 0.115mm Single coated Reflective tape

For use as danger indicators at construction sites, walkways, factories, and train stations. Highly reflective. Color: Yellow/Black.

- Printed film
- Glass beads
- Aluminum vapor deposition
- Acrylic adhesive
- Release paper

Stadiums

Butyl tape has the superior adhesive properties needed to waterproof the concrete joints in the stands of outdoor sporting facilities such as international sporting arenas, baseball fields, and soccer stadiums.

C Waterproofing (stands)

PC joint and waterproof coating insulation

Waterproof coating
Super Butyl Tape (No.4420)
Caulking
PC plate

NO.4420 Super Butyl Tape
Thickness 0.750mm Single coated

- Nonwoven polyester fabric
- Polyethylene film
- Butyl rubber adhesive
- Release paper

NO.9244 Super Butyl Tape
Thickness 0.500mm Single coated

- Nonwoven polyester fabric
- Polyethylene film
- Butyl rubber adhesive
- Release paper

Large Suspension Bridges

Filament tapes, with their shock, weather, and water resistant properties are used as a superior heavy bundling material in the main cables of large suspension bridges. Additionally, these tapes are excellent as a binding material for wires and steel sheet coils, and for fixing the ends of transformer coils.

A Bundling (main cables)

NO.9110 Filament Tape
Thickness 0.180mm Single coated

- Polyester film (19µm)
- Glass fiber
- Rubber adhesive

NO.9510 Filament reinforced tape
Thickness 0.170mm Single coated

- Polyester film (19µm)
- Polyester fiber
- Rubber adhesive

The photograph to the left shows 5 mm diameter piano wires bound in a hexagonal shape (1 strand). This strand (bundle) is combined with many others like it to form the cables that support large suspension bridges.

Single Family Home (masking)

Floor masking
Homes employing 2x4 construction are built from the ground up. Therefore, masking of the floors is necessary for the long-term protection of floors. The tape having easy removability and good workability is used for fixing surface protection sheets.

Moving
A high level of workability and functionality is demanded of masking work during a move. Our tapes are easy to tear by hand, leave no sticky residue, and maintain high dimensionality in both fixing force and removability.

D Floor masking, Moving

NO.3440 Masking Tape
Thickness 0.140mm Single coated

- Polyethylene fabric
- Acrylic adhesive

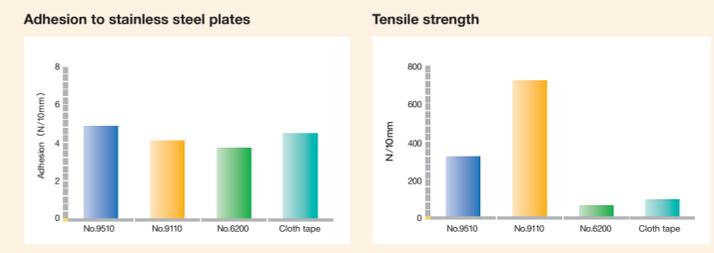

NO.3448 Masking Tape
Thickness 0.150mm Single coated

- Polyethylene fabric
- Acrylic adhesive

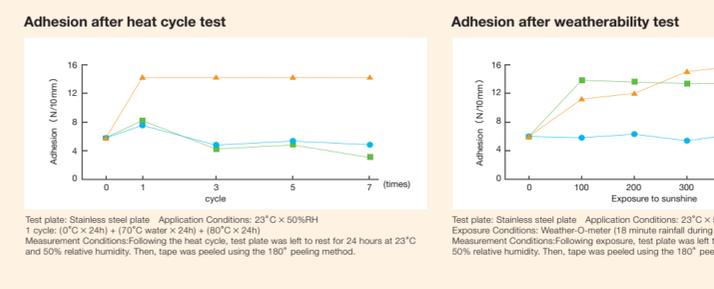

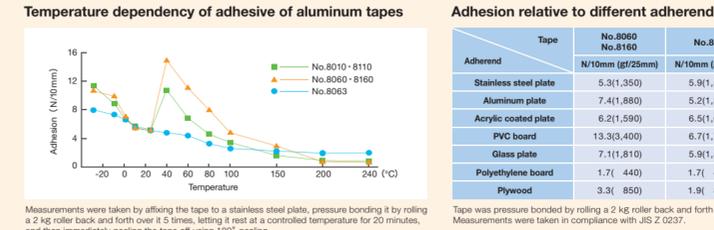

NO.3489 Masking Tape
Thickness 0.165mm Single coated

- Polyethylene laminated synthetic fiber cloth
- Acrylic adhesive

A Filament Tape Adhesion Properties

B Aluminum Tape Adhesion Properties

Buildings and Apartments

A superior tape which offers air-tightening, durability, anti-humidity and anti-aging properties for the sealing of duct joints and insulation joints, and the waterproofing of roofs. Additionally, this tape can be used to mask steel beams, rebar, steel pipes, and concrete surfaces of outdoors which are exposed to adverse conditions. We even have a masking tape that is optimal for preventing dust from scattering when working indoors. These products support a wide range of building projects from housing complexes to office and tenant buildings.

B Joint insulation

NO.8070 Aluminum tape (matte)
Thickness 0.080mm Single coated

- Aluminum foil (50µm)
- Bond
- Acrylic adhesive
- Release paper

NO.9810 Aluminum glass cloth tape
Thickness 0.195mm Single coated

- Aluminum foil
- Bond
- Glass cloth
- Acrylic adhesive
- Release paper

C Waterproofing (roof)

NO.4420 Super Butyl Tape
Thickness 0.750mm Single coated

- Nonwoven polyester fabric
- Butyl rubber adhesive
- Release paper

NO.9244 Super Butyl Tape
Thickness 0.500mm Single coated

- Nonwoven polyester fabric
- Polyethylene film
- Butyl rubber adhesive
- Release paper

D Masking (painting)

NO.3372 Cloth Masking Tape
Thickness 0.290mm Single coated

- Polyethylene laminated cloth
- Rubber adhesive

NO.3430 Cloth Masking Tape
Thickness 0.330mm Single coated

- Polyethylene laminated cloth
- Rubber adhesive

NO.9244 Super Butyl Tape
Thickness 0.500mm Single coated

- Nonwoven polyester fabric
- Polyethylene film
- Butyl rubber adhesive
- Release paper

Single family home (Other application)

Exterior wall
The tape is used as a jointing structure when applying outer wall tiles with adhesive on a sliding substrate. It relieves the stress on the tiles and prevents from cracking.

Interior panel
This double-coated tape is used together with adhesives during renovation projects to temporarily affix building materials such as wall panels, decorative panels, and kitchen panels, and also to affix interior panels. Its superior initial adhesion and ability to adhere to uneven surfaces make the streamlining of fixing tasks possible.

D Exterior wall

NO.4420 Super Butyl Tape
Thickness 0.750mm Single coated

- Nonwoven polyester fabric
- Butyl rubber adhesive
- Release paper

NO.5567 D/C PE foam tape
Thickness 1.100mm Double coated

- Acrylic adhesive
- Special foam polyethylene (White)
- Acrylic adhesive
- Release paper

NO.9244 Super Butyl Tape
Thickness 0.500mm Single coated

- Nonwoven polyester fabric
- Polyethylene film
- Butyl rubber adhesive
- Release paper

D Interior panel

NO.8070 Aluminum tape (matte)
Thickness 0.080mm Single coated

- Aluminum foil (50µm)
- Acrylic adhesive
- Release paper

NO.8071 Aluminum tape (matte)
Thickness 0.080mm Single coated

- Aluminum foil (50µm)
- Acrylic adhesive

B Floor heating

NO.8070 Aluminum tape (matte)
Thickness 0.080mm Single coated

- Aluminum foil (50µm)
- Acrylic adhesive
- Release paper

NO.8071 Aluminum tape (matte)
Thickness 0.080mm Single coated

- Aluminum foil (50µm)
- Acrylic adhesive

C Super Butyl Tape Adhesion Properties
